

San Diego

San Diego

The decoflame® San Diego is a wall-mounted bioethanol fireplace designed to fit into all modern homes. The San Diego is ideal for creating a pleasant atmosphere and efficiently supplements existing heating systems.

In a room of 30-40 square meters it can raise the temperature by around 3-5 degrees centigrade. San Diego offers space for your personal touch by choosing between several standard colours and further RAL colours as well as different backgrounds. The San Diego fireplace can also be made to bespoke measurements. This model is installed easily and comes with special wall brackets.
